EDUCATION

Bachelor´s in Economics, Universidad del Pacífico

2021-2025

Class rank: 11th out of 79 (Top 14%)

Relevant coursework: Econometrics & Causal Inference and Machine Learning

RESEARCH INTERESTS

Applied Microeconomics and Public Policy

EXPERIENCE

Research Assistant

Sep 2024 - Dec 2025

Centro de Investigación de la Universidad del Pacífico (CIUP)

Lima, Peru

- Conducted diagnostic analysis of university teaching careers in Peru, contributing to the design of an institutional compensation determination model for public faculty.
- Supported empirical analysis on the determinants of university student dropout during the COVID-19 pandemic to document correlational and structural patterns.
- Estimated return on investment in public health through cost-benefit analysis applied to overweight, obesity, and comorbidity treatment programs.
- Contributed to a policy-oriented report reviewing labor market policies.
- Supported theory of change development and district prioritization for Peru Sostenible's "Juntos por las Personas" intervention.

Intern

Jan 2026 - Mar 2026

Food and Agriculture Organization of the United Nations (FAO)

Rome, Italy

- Processed household survey data for Ghana and contributed to the setup of a Stochastic Frontier Analysis (SFA) framework under FAO's Hand-in-Hand Initiative.

TEACHING EXPERIENCE

Undergraduate Teaching Assistant

Econometrics I - Universidad del Pacífico

2025-II

RESEARCH

The effect of parental death on early childhood education: evidence from the Peruvian case. Victor Lau, Mauricio Chumbiauca; 2025 (Undergraduate Thesis). *Investigated the causal effects of parental loss on seven educational and time-use outcomes in Peru using a staggered Difference-in-Differences framework. Found significant and persistent reductions in school enrollment and daily attendance. Evidence from mechanism analysis indicates that these disruptions operate through a combination of financial constraints and lower expectations of educational returns.*

SKILLS

Programming Languages

Python, Stata, R

Software

Microsoft Office (Word, PowerPoint, Excel (VBA))

Tools

LaTeX, GitHub (Control version)

Languages

Spanish (Native), English (Advanced)
